

GOVERNMENT NEEDS
STENOGRAPHERS

Until August 31, 1918, local boards will accept applications for stenographers from registrants qualified for limited or special military service only, for good stenographers who have had legal training.

Men who qualify under this call will probably be assigned to the Judge Advocate General's and Provost Marshal General's departments, and they will be required to report court martial cases and attend to other matters pertaining to military law in the field.

The work is interesting and will give invaluable experience to the fortunate applicants.

Qualified registrants are urged to present themselves to their local boards and have their names listed for this service.

Chief Clerk Local Board.

YELLOW JACKETS
TARTAR EMETIC

When yellow jackets build their nests about dwelling houses they can be destroyed in two or three days by setting near the nest a poison bait made by dissolving four grains of tartar emetic in a tablespoonful of hot water, and adding 2-3 cup of strained honey. Put a teaspoonful of this mixture near the entrance of the nest and replenish as often as it is used up. The poison attracts bees and should be used with care where bees are present.

Movies in Jerusalem

The moving picture has acquired a sudden and enormous popularity in Jerusalem, particularly among the native population, according to letters from soldiers there. It is impossible to accommodate the crowds that try to attend the theatres. People almost fought to get into a big theatre when the film depicting the occupation of Beersheba was shown.

KNITTER BECOMES
SHELL MAKER

Chicago Girl Abandons Yarn to Take Job in Pullman Munitions Plant

Chicago's champion knitter has become a munitions worker. She is Helen Dillon, of Charles Street, Chicago, now working in a factory at Pullman.

The young woman's splendid success in knitting for the soldiers inspired her with a desire to undertake some more important work in the war program, and she is now engaged in an important branch of shell manufacture. According to the reports received by the department of labor, she finds this work not only more patriotic but more remunerative.

SONS AT WAR,
SHE MAKES SHIPS

Mrs. Underwood Doing Everything Possible to Support Army

Mrs. G. Underwood of Vancouver, Wash., has two sons in the army.

Realizing the nation's great need of ships to supply the soldiers in France, she determined to do everything in her power to make certain that her boys got all the guns, food and clothing they needed. Therefore, she entered a shipyard and is working there every week day as a calker.

She is head of a group of five and directs them very efficiently. One day when her four assistants failed to put in an appearance, Mrs. Underwood operated the calking machinery alone and did so well that she almost proved her assistants to be nonessential. Rather than take another chance, they are appearing promptly every day to aid her in the work for the boys abroad.

Her record is among the most remarkable of which word has come to the department of labor.

PROVIDE GRIT
FOR POULTRY

Grit is essential to the health of fowls and to economy in feeding. Grit takes the place of teeth in preparing the feed for further digestion, and is required for the proper preparation of feed in the gizzard. When the feed is not properly taken care of in this organ, an undue strain is thrown on the fowl's system, often resulting in disease, and also allowing much of the nutriment to pass through the bird's body without being absorbed. In every pen or yard a box of grit should be kept. Investigators have asserted that grit is a part of the necessary feed, giving the fowls strong bones and a bright plumage.

MUCH IN LITTLE

Duplex springs have been invented by a Californian, an auxiliary spring coming into action if the main one breaks or is overloaded.

A man who is connected with the heavy artillery is no more likely to be killed than one in the employ of a railroad, army officers say.

St. Louis is experimenting with surrounding traffic policemen at night with light thrown from searchlights mounted on nearby buildings.

Paris has established a museum of the horse, presenting a complete history of the animal from the earliest known period to the present day.

To equalize unemployment in the winter months, members of Seattle (Wash.) Painter's union will work five days a week. Saturday will be the off day.

Without counting 1,413 men already serving in dockyards and military stations on the outbreak of the war, 5,951 London police officers are engaged in war service.

The Great Western Railway system extends over 3,008 miles, thus taking first place in the United Kingdom. The Northwestern comes second, with 1,969 miles.

Nothing Else Like it in St. Helens

There has never been anything in St. Helens with the INSTANT action of simple buckthorn bark, glycerine, etc., as mixed in Adler-I-ka. ONE SPOONFUL flushes the ENTIRE bowel tract so completely it relieves ANY CASE sour stomach, gas or constipation and prevents appendicitis. The INSTANT, pleasant action of Adler-I-ka surprises both doctors and patients. A. J. Deming, Druggist.

No Need for Brakes

A Georgian from up in the mountains came to town on his annual trip with a load of corn, sweet potatoes, and other produce to exchange for groceries. As he neared the city he saw a sign: "Speed Limit 15 Miles an Hour." Prodding his oxen frantically with a stick he muttered: "By golly! I don't believe we can make it."

Packers' Profits
Are Regulated

The public should understand that the profits of the packers have been limited by the Food Administration since November 1, 1917. For this purpose, the business of Swift & Company is now divided into three classes:

Class 1 includes such products as beef, pork, mutton, oleomargarine and others that are essentially animal products. Profits are limited to 9 per cent of the capital employed in these departments, (including surplus and borrowed money), or not to exceed two and a half cents on each dollar of sales.

Class 2 includes the soap, glue, fertilizer, and other departments more or less associated with the meat business. Many of these departments are in competition with outside businesses whose profits are not limited. Profits in this class are restricted to 15 per cent of the capital employed.

Class 3 includes outside investments, such as those in stock yards, and the operation of packing plants in foreign countries. Profits in this class are not limited.

Total profits for all departments together in 1918 will probably be between three and four per cent on an increased volume of sales.

The restrictions absolutely guarantee a reasonable relation between live stock prices and wholesale meat prices, because the packer's profit cannot possibly average more than a fraction of a cent per pound of product.

Since the profits on meat (Class 1) are running only about 2 cents on each dollar of sales, we have to depend on the profits from soap, glue, fertilizer (Class 2, also limited) and other departments, (Class 3) to obtain reasonable earnings on capital.

Swift & Company is conducting its business so as to come within these limitations.
